**Add A Link To An External Tool
To a Canvas Course**

CSU has a process to approve the integration of an external tool into our Canvas system.
Once installed, a tool can usually be added as an external tool link to a Canvas course module or assignment.
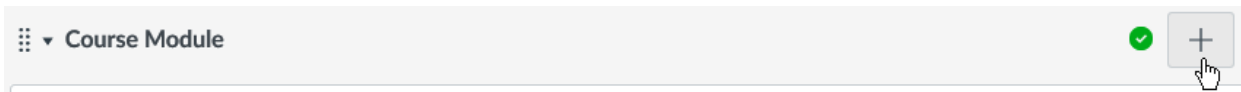

Support for external tools is provided by the maker of the tool and not CSU.
We recommend that you add a link in your course module to the tool maker's support page for that external tool.

I. Add An External Tool to a Course Module

    a) In a Canvas module, to the far right of the module's name, click " + "

    b) Under the **Add drop down menu** *select* **External Tool.**

c) *Select* the **external tool** you would like to use.

Select a tool from the list below, or enter a URL for an external tool you already know is configured with Basi this module.

d) For some tools to work properly, you *may need to check* the "**load in a separate tab** in a web browser" box.

Load in a new tab

e) At the bottom *click* **Add Item.**

Cancel   Add Item

f) *Click* on the **tool link to be sure it works**.

g) *Add* a **link in the module to the vendor's user support page.**

II. Add An External Tool To A Canvas Assignment.

Some external tools are designed to be part of a Canvas assignment.
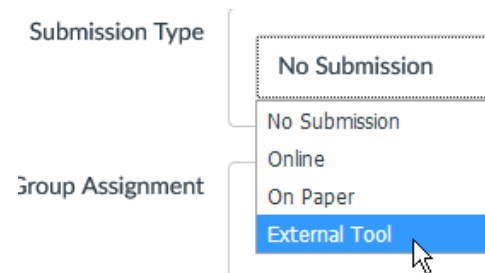

a) On **the left course menu** *click* **Assignments**.
b) *Click* **" + "** to create a new assignment.

c) *Click* **More Options.**

d) Under **Submission Type** *select* **External Tool.**

e) *Click* **Find** to see a list of external tools.

f) *Select* the **external tool** you would like to use.

Select a tool from the list below, or enter a URL for an external tool you already know is configured with Basi this module.
