

Change Canvas Course Home Page

Spring 2020 student feedback asked for more consistent course layout and navigation in all Canvas courses. For consistency, the new CSU Canvas Course Template is applied to all Canvas academic courses, and provides a customizable home page, with links to Modules and a Start Here page.

If you perform a course import to copy previous course content into your course, and you already have a home page which provides course information and an easy way to get to course modules, you can quickly set your course Home page to match your previous course.

Change Course Home Page

On the left course navigation, click Pages.

Home

Pages

Click the View All Pages button, located on the top left side of the window.

View All Pages
